LINCOLN EXPANDS WINDOW LINE

New Push-Out Casement now available.

Merrill, WI. (June 11, 2008) – Lincoln continues to expand their window line with the addition of a new Push-Out Casement. Charming old-world style combined with today's modern features make these windows beautiful inside and out. The sash swings open with a simple turn of the handle while friction hinges keep it firmly in place whether fully or partially opened. Customers can choose from a traditional hinged screen or an innovative retractable screen that rolls up when not needed, leaving a clear view of the outdoors.

Features of the new window include:

- Single handle for easy operation available in three finishes including: Satin Nickel, Polished Brass and Faux Bronze.
- Multi-point locking system directly routed into the stile for greater performance, security and durability.
- Adjustable 3-point stainless steel high-friction washability hinges on top and bottom allow easy access to clean the window from the inside.
- Full surround dual weatherstripping that actually seals tighter the stronger the wind blows.
- DP50 certification upgrade available.
- A host of options including: six interior wood species, three frame and sash exteriors, multiple glass choices, three styles of grids and custom sizing.
- Available sash limiter to control how far the unit will open.

Lincoln Wood Products, Inc. has been manufacturing high quality wood windows and patio doors for new construction, remodeling and light commercial projects for over 60 years. Based in Merrill, Wisconsin, the privately owned company engineers windows and patio doors for visual appeal as well as outstanding performance and backs it up with exceptional customer service before and after the sale. Lincoln windows and patio doors are marketed through a network of over 400 independent distributors throughout the U.S. For more information visit www.lincolnwindows.com or call 715.536.2461.
