## LINCOLN IMPROVES THE VIEW

BetterVue screens now available.

**Merrill, WI. (September 22, 2008)** – Lincoln announces the addition of BetterVue screens to their vast array of product options.

BetterVue screens are constructed utilizing a fire-retardant charcoal fiberglass yarn that is smaller in diameter than standard fiberglass screens. The smaller yarn improves the openness of the screen providing homeowners with better visibility, increased light transmittance, greater airflow and improved curb appeal.

In addition to having a smaller yarn, the mesh is woven in a tighter weave creating smaller holes. These smaller holes extend the screen's benefits by providing enhanced protection from small insects (no-see-ums), debris and dust.

Standard Screen

BetterVue Screen

Lincoln Wood Products, Inc. has been manufacturing high quality wood windows and patio doors for new construction, remodeling and light commercial projects for over 60 years. Based in Merrill, Wisconsin, the privately owned company engineers windows and patio doors for visual appeal as well as outstanding performance and backs it up with exceptional customer service before and after the sale. Lincoln windows and patio doors are marketed through a network of over 400 independent distributors throughout the U.S. For more information visit [www.lincolnwindows.com](http://www.lincolnwindows.com) or call 715.536.2461.
