LINCOLN IMPROVES WINDOW LINE

Redesigned Glider now available.

Merrill, WI. (February 16, 2009) – Lincoln introduces their new and improved Glider Window.

The completely redesigned Glider is a single slider with one operating sash or a triple slider with operable flankers and a stationary picture sash center. An option for a full or half screen completes the product.

Aluminum clad units feature extruded frames and sash, making them a horizontal compliment to Lincoln's popular double hung line. Now manufactured with cope joints instead of mitered joints, the clad windows have a more aesthetically pleasing look and will match the rest of Lincoln's window lines. The new Glider is also available in Lincoln's popular W-V vinyl clad exterior.

New durable solid brass rollers reduce friction and improve functionality while the new low profile pick-resistant sash locks are available in seven finishes including: White, Bronze, Satin Nickel, Polished Brass, Oil-Rubbed Brass, Faux Bronze and Coppertone.

Lincoln Wood Products, Inc. has been manufacturing high quality wood windows and patio doors for new construction, remodeling and light commercial projects for over 60 years. Based in Merrill, Wisconsin, the privately owned company engineers windows and patio doors for visual appeal as well as outstanding performance and backs it up with exceptional customer service before and after the sale. Lincoln windows and patio doors are marketed through a network of over 400 independent distributors throughout the U.S. For more information visit www.lincolnwindows.com or call 715.536.2461.
